THE TWO OFFERS

OFFER 01

Resources

Wynura provides implementation resources — professional and technical people and delivery capacity — to institutions and larger firms that need AI and IT work delivered inside their own operations, supplied as Wynura's delivery capacity and partner bench under Wynura's delivery discipline: a named human accountable, live-agent escalation, and a full audit trail.

OFFER 02

IT & AI Implementation

Wynura implements end to end: operations automation, workflow and document systems, AI-enabled tooling, and lender-operations automation — integrated with the systems the customer already runs, deployed remotely, and proven first in a 14-day proof of concept on the customer's own data.

CAPABILITIES

- Operations-automation deployment — purchase-order chase, invoice checking and 3-way match, stock alerts, quotes and follow-up, order-status answers
- Workflow and document systems — document chase and invoice follow-up with reply detection, escalation and one shared record
- Lender-operations automation — borrower document chase, deal packaging for underwriting, maturity and renewal watch, file-status answers
- AI-enabled tooling — AI-assisted classification, drafting and status answers; a human approves every money point; no automated credit decisions
- End-to-end integration — CRM where a customer requires it, mailboxes, accounting and line-of-business systems; counterparties reached over plain email, no portals or logins for them

DELIVERY MODEL

- **POC-first:** a 14-day proof of concept on the customer's own data, scoped to chosen modules, decided on measured results — before any program commitment
- **A person, not a queue:** a named human owns every engagement from day one; a live agent takes over any conversation that needs a person
- **Nothing ripped out:** the stack runs beside the systems already in place; first chase live within days
- **Measured:** results reported in the open — chase hours, documents collected, matches cleared, answers handled

SERVICE GEOGRAPHY

Now: Canada · United States (data residency in either, at the customer's choice). **Next, as each market's compliance gates pass:** United Kingdom · Ireland · Australia · New Zealand, then further markets in sequence.

SECURITY & COMPLIANCE

Security and compliance are the first priority of the build — ahead of features and scale. Encryption in transit and at rest; strict per-tenant isolation proven by tests on every release (no pass, no ship); customer data never sold, never shared, never used to train models for anyone else; export or delete at any time. Designed to operate within **PIPEDA** and **CASL**; controls **aligned** to SOC 2 and ISO/IEC 27001 & 42001 practices, and to **OSFI Guideline E-23** for regulated lender deployments — **alignment, not certification**: Wynura holds no certifications and claims none.
